📌 Open to work

👤 SUMMARY

Technical Artist and Unity Developer specialized in real-time visualization, simulation systems, and interactive experiences. Over the last 7 years I have worked across game development, architectural visualization, environmental simulations, and AI-assisted production workflows, delivering production-ready solutions for both entertainment and commercial applications.

🛠 SOFTWARE PRODUCTS & STARTUPS

Alloy | AI Receptionist & Appointment Automation Platform

03/2026 – Present

Founder & Lead Developer

Built an AI-powered virtual receptionist for WhatsApp that automates customer communication, lead qualification, appointment scheduling, and business workflows for service-based companies.

VideoBooth Systems

05/2026 – 06/2026

Lead Software Developer | AI Video Background Removal Platform

Developed a professional AI-powered background removal application for video and image sequence processing, integrating multiple state-of-the-art segmentation models into a unified workflow.

🏠 3D VISUALIZATION & SIMULATION

Light Pollution Impact Study

10/2025 – 12/2025

Alex Cook | Upwork Client

(Remote) Plymouth, MA,
United S

Created a **real-time 3D simulation** to demonstrate vehicle headlight light pollution caused by a proposed residential road developed under **Massachusetts Chapter 40B regulations**. The project used **accurate topographic and site plan data** to simulate road geometry, vehicle movement, and light behavior, clearly showing repeated light intrusion into an existing home. The visualization was submitted as **technical evidence** to the **Plymouth Zoning Board of Appeals (ZBA)** as part of the public public-comment record, helping communicate complex environmental and urban-impact issues through clear, realistic visuals.

Interior Scene | Real-Time Lighting

09/2025 – 09/2025

Siddharth B. | Upwork Client

(Remote) Bengaluru,
India

High-quality interior environment created in **Unity HDRP** featuring **fully real-time lighting** (no baked lightmaps). Focused on cinematic lighting, post-processing, and material accuracy. Delivered in **under 5 hours**.

🎮 GAME DEVELOPER EXPERIENCE

Developer & Artist | Between Songs & Demons

2025 – Present

Don Aitor (@don.aitor) ↗

(Remote) Spain, El Ejido

Developing retro-horror titles (PSX style) in Unity, focusing on technical implementation and low-poly assets creation. Responsible for game logic, level design, and ensuring consistent "play station 1" visual performance.

- [Project](#) ↗

Developer & Artist | SAVIA (Global Game Jam)

Game Jam Plus 24/25

2024 – 2025

(Remote) San Pablo,
Brasil

A first-person psychological thriller set in the South American Gran Chaco. Developed as a high-stakes prototype in just 48 hours, this project achieved international recognition, ranking **#60 worldwide** and standing as *the only Argentinian semifinalist*. Using the full C# framework, including advanced task-oriented AI, survival systems (health, fishing, hunting) and driving mechanics.

Developer & Artist | Echoes of the Plains

Personal project

2024 – 2025

Salta, Argentina

A suspense experience inspired by the game *Fears to Fathom*, centered on realistic, everyday fear rather than supernatural elements. Cultural details, and real-life situations to create tension through subtle, believable scenarios.
I handled the full end-to-end production, including game programming, environment design, lighting, and custom 3D asset creation in Blender. For character development, I integrated AI-assisted prototyping (*Tripo3D.ai*), followed by manual retopology, optimization to achieve a high-fidelity atmosphere while maintaining strong performance on low-end Android devices.

 SKILLS

AI & Emerging Tech

AI-Assisted Software Development, AI Workflow Design, Rapid Prototyping, Generative AI Content Pipelines

Stack

C#, Unity, Blender, Firebase, REST APIs, Git, AI Integrations, Automation Systems

3D & Digital Art

Blender (Expert Rigging, Modeling, Animation), Architectural Visualization (Blender) Materials, Texturing

Post-Production

Adobe After Effects, Premiere Pro, Photoshop, Audition

Project Management

Documentation, Trello, Agile

 LANGUAGES

Spanish

English
